Assembly Preparation

Before Beginning:

Unpack all hardware bags and components to ensure you have all parts. Take note of bolt hardware size differences and components that may have directional labels (Example: TOP or FRONT).

Depending on your furniture product, foam, packing dust, or residual film or finish may be present on the components. This is normal and can be wiped clean using a non-colored, lint-free dry cloth.

Read the assembly instructions, cover-to-cover. Save any **Care and Maintenance** instructions pages for after the assembly has been completed.

It is always recommended to have 2 adults on hand for assembly.

Do not assemble on hard, abrasive flooring or carpeted surfaces that can damage or get caught in the components during assembly.

Assemble on a clean non-marring surface (such as the product's packing foam).

Do not discard any packaging until the product has been fully assembled.

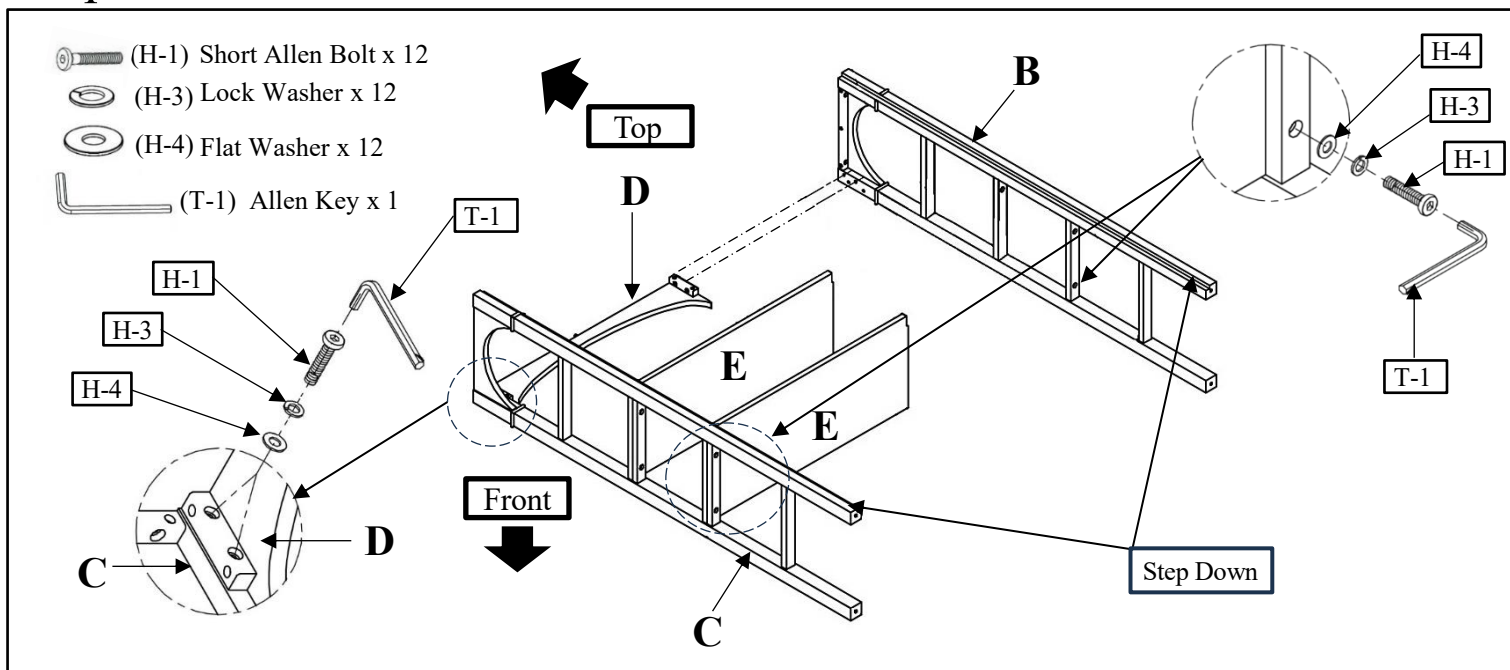

In case of missing parts, please contact your nearest World Market store or call our customer service call center at 1-877-967-5362.

WARNING: Small parts are a choking hazard. Adult supervision is required before, during, and after assembly.

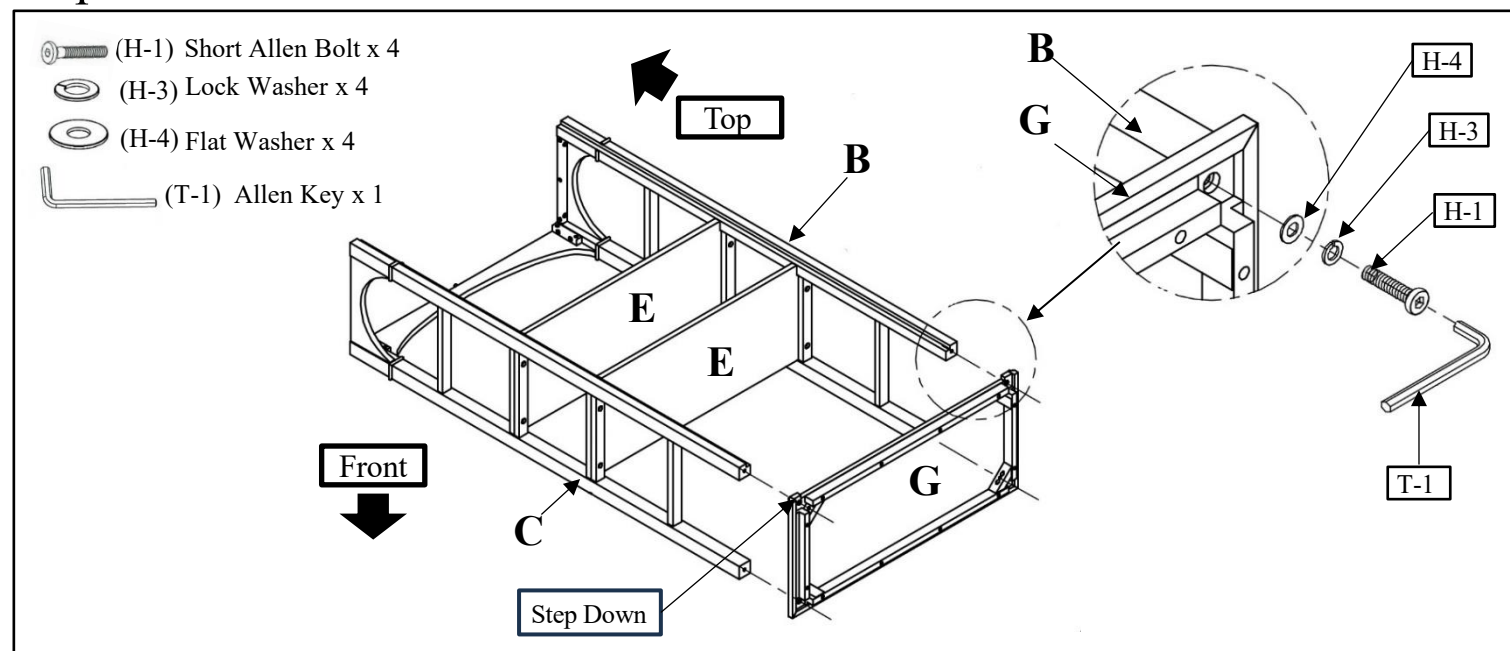

Assembly Steps

Step 1

Place the Left/Right Side Frame (B/C) on a padded, non-marring surface. Ensure the step down is facing up. Position the Upper Front Apron (D) and the two Fixed Shelves (E) with the Left/Right Side Frames (B/D), as shown, and aligning pre-drilled holes. Secure by engaging 12 (four per each component) Flat Washers (H-4), Lock Washers (H-3) and Short Allen Bolts (H-1), stacking the hardware in the order as shown. Once engaged, fully tighten using the provided Allen Key (T-1). DO NOT OVER TIGHTEN.

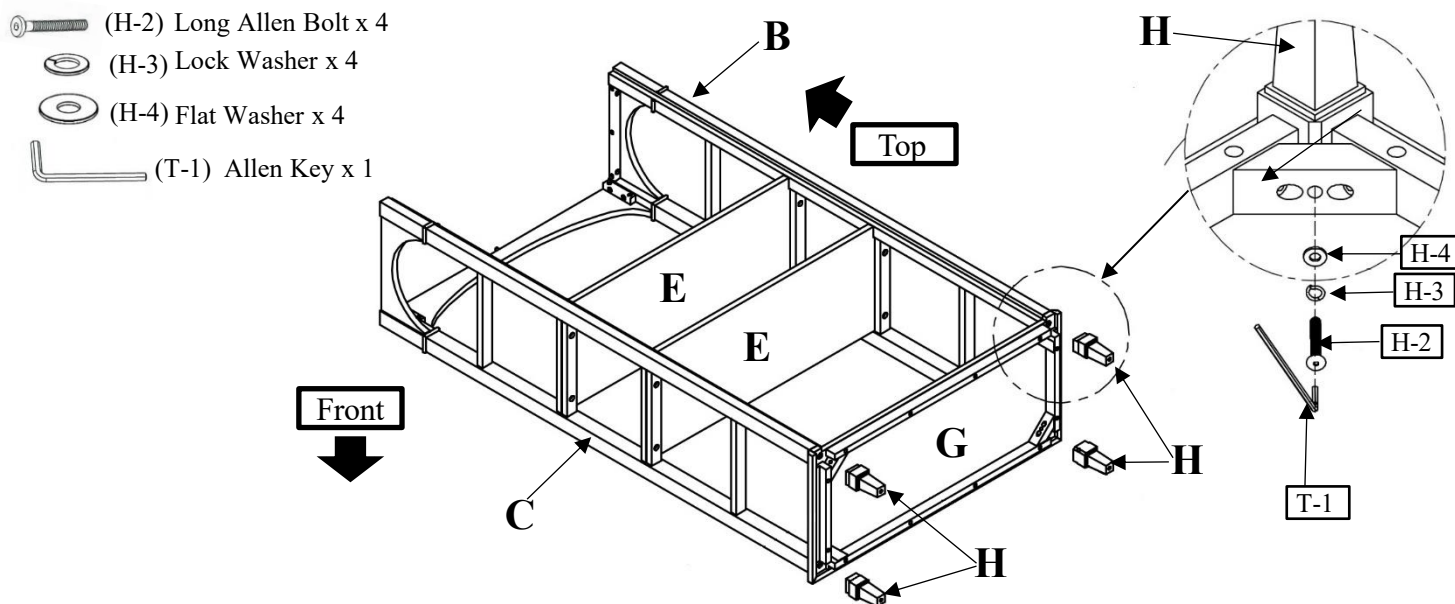

Step 2

Position the Bottom Panel (G) with the assembly, ensuring the step down is facing up, and align the pre-drilled holes. Secure by engaging four (one per corner) Flat Washers (H-4), Lock Washers (H-3) and Short Allen Bolts (H-1), stacking the hardware in the order as shown. Once engaged, fully tighten using the provided Allen Key (T-1). DO NOT OVER TIGHTEN.

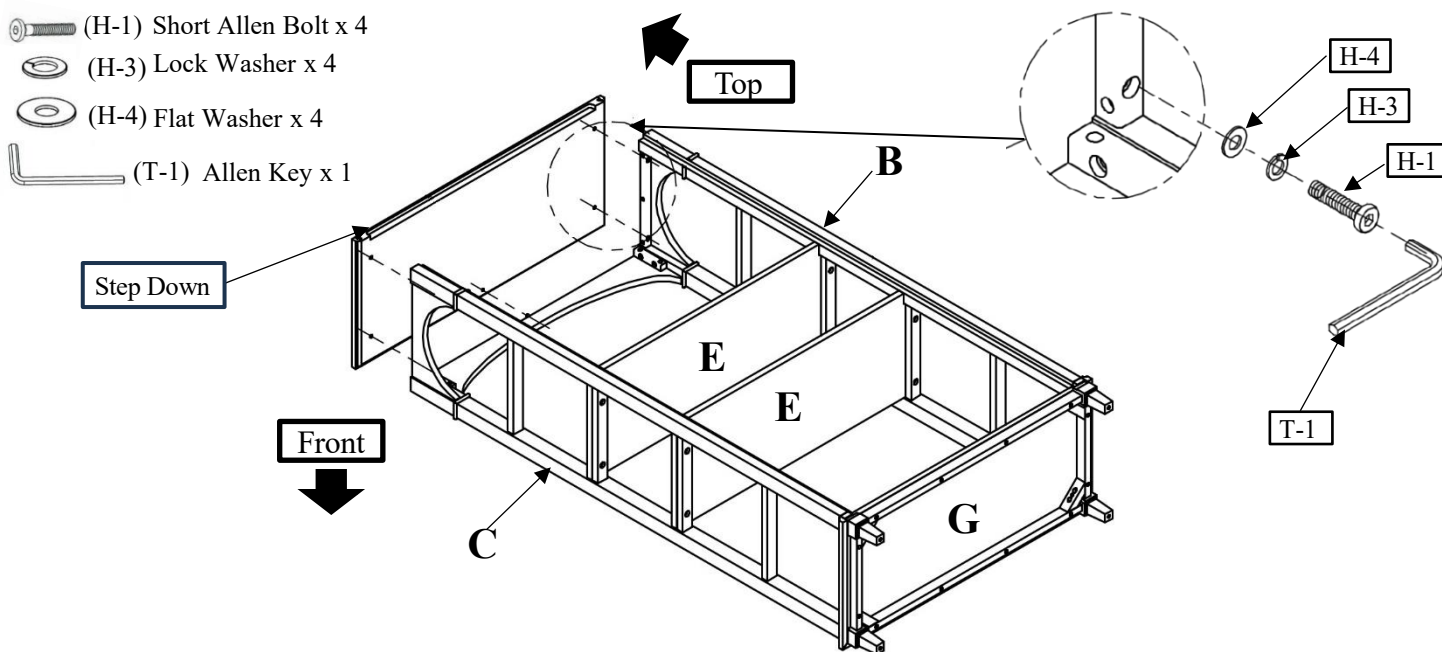

Assembly Steps

Step 3

Position the Legs (H) to each corner of the Bottom Panel (G), aligning the pre-drilled holes on both sides. Secure by engaging four (one per leg) Flat Washers (H-4), Lock Washers (H-3) and Long Allen Bolts (H-2), stacking the hardware in the order as shown. Once engaged, fully tighten using the provided Allen Key (T-1). DO NOT OVER TIGHTEN.

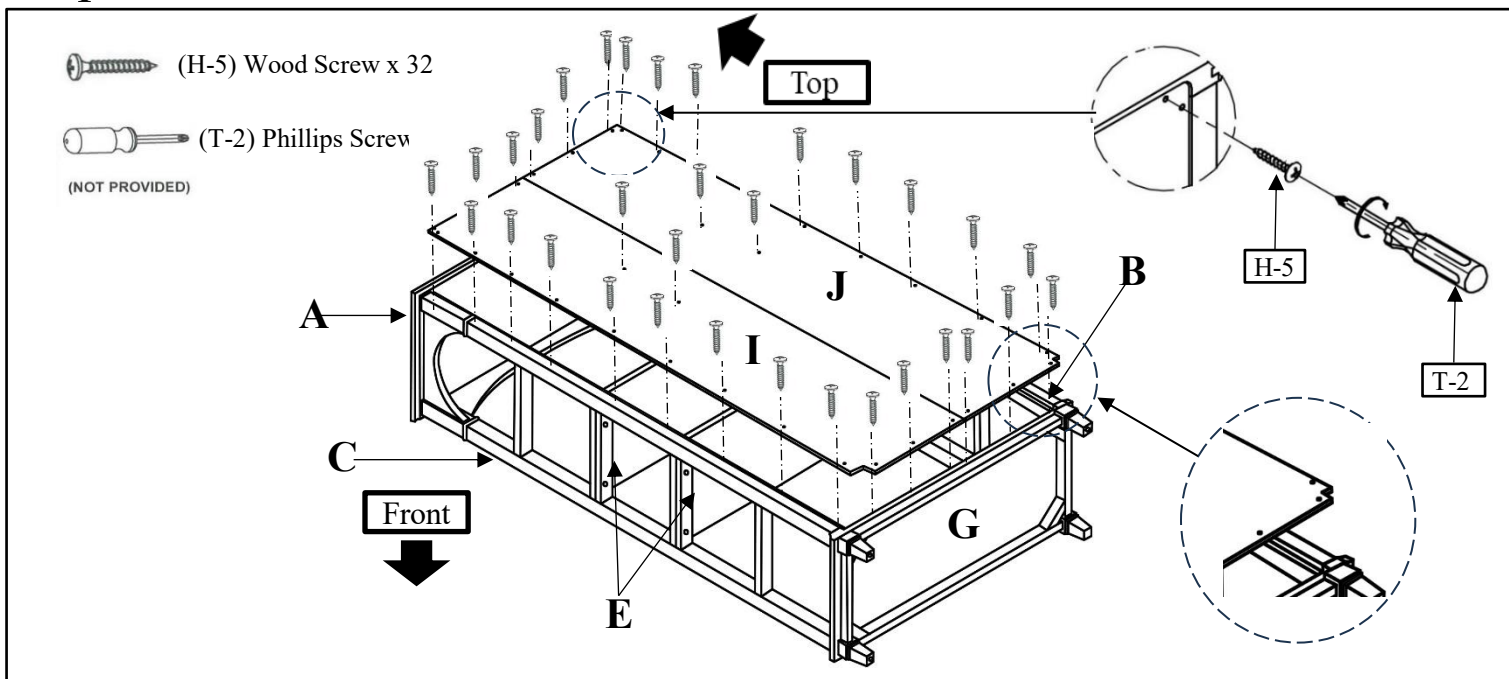

Step 4

Position the Top Panel (A) with the assembly, ensuring the step down is facing up, and align the pre-drilled holes. Secure by engaging four (two per side) Flat Washers (H-4), Lock Washers (H-3) and Short Allen Bolts (H-1), stacking the hardware in the order as shown. Once engaged, fully tighten using the provided Allen Key (T-1). DO NOT OVER TIGHTEN.

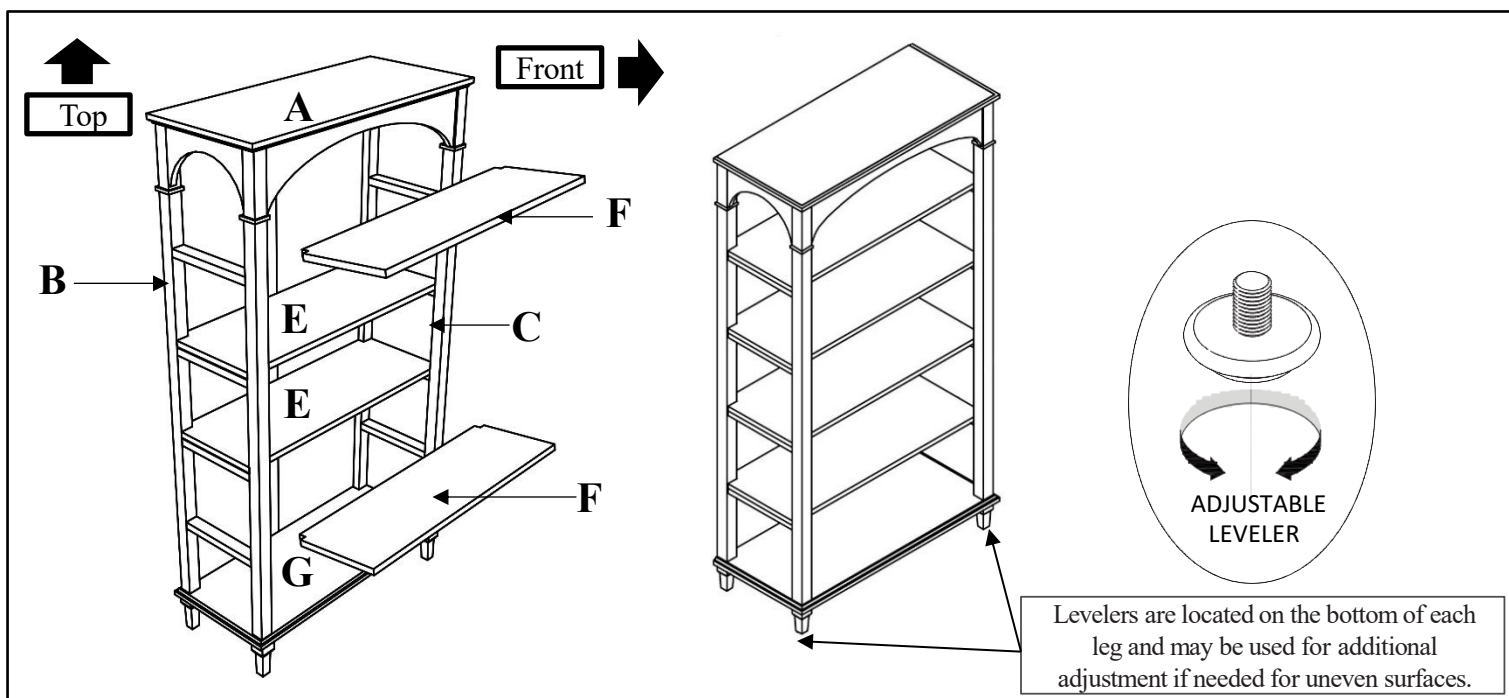

Assembly Steps

Step 5

Place the Right/Left Back Panel (I/J) with the assembly so that it nests in each step down in all components. Ensure the notches are toward the bottom and that the finished sides face toward the front. Secure by engaging x32 Wood Screws (H-5) into each receiving hole on the Right/Left Back Panels (I/J) and fully tighten using a Phillips Screwdriver (T-2; not included). **DO NOT OVER TIGHTEN.**

Step 6

Using a second person to assist you, carefully turn assembled unit upright. Insert the Removable Shelves (F) by holding them at an angle and inserting them through the front. They will rest on the Right/Left Side Frames (B/C). Assembly is now complete and the product is ready for use. Adjustable levelers are located on the bottom of each leg and may be adjusted by turning outwards, counter-clockwise to help account for uneven surfaces. **NOTE:** Hardware may loosen over time. Periodically check that all connections remain tight and adjust as needed.

Anti-Tip Measures

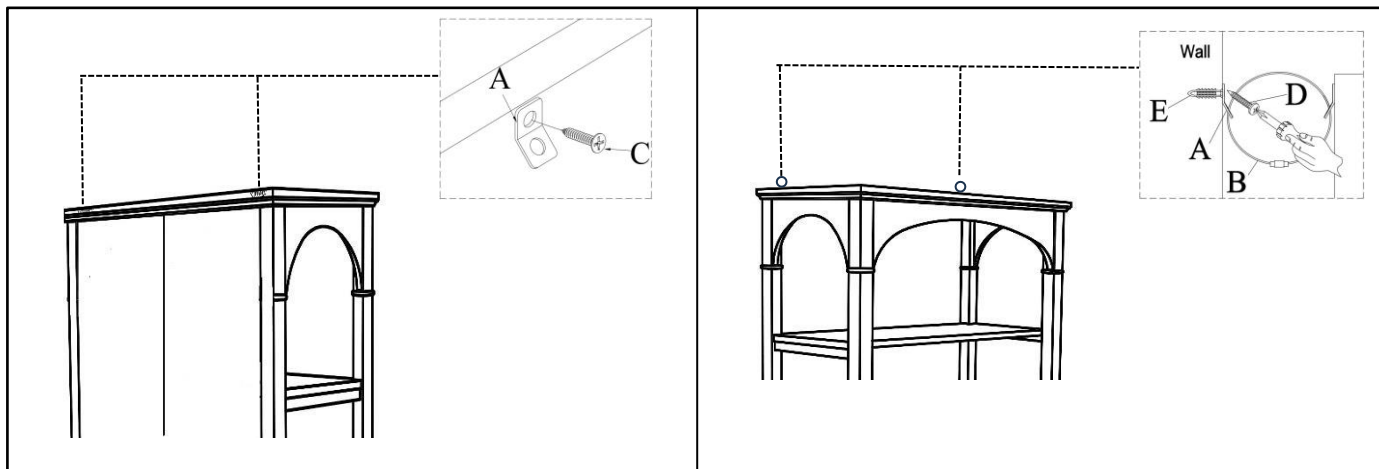

WARNING

Furniture tip overs can result in death or serious injuries. To reduce the likelihood of tip over, this product should be used with the enclosed Anti-Tip Kit. This Anti-Tip Kit is only a deterrent. It is not a substitute for proper adult supervision. Manufacturer and retailer assume no liability for improper installation or excess loads placed on screws, brackets, or straps. When properly installed, this restraint provides protection against unexpected tipping of furniture. This Anti-Tip Kit **MUST** be installed into the wall using proper mounting hardware OR into a wall stud using appropriate screws. Position of the Anti-Tip Kit depends on the product and the location of the wall studs. The hardware provided is not a comprehensive solution for all wall types. Be sure to consult a professional or your local hardware store to determine the hardware needed for your specific wall type (plaster, drywall, concrete, etc.).

Anti-tip kit contents

- Metal Brackets (A)  (4)
- Restraint Straps (B)  (2)
- Short Screws (C)  (2)
- Long Screws (D)  (2)
- Anchors (E)
(for concrete wall)  (2)

Anti-tip kit installation

Place the unit in the desired final location against a wall. It is suggested to use a stud finder to find wall studs along the length of the unit and roughly 1 inch below the top of the unit. Where possible, mark a drill hole position on the wall where there is a stud and use a drill or screwdriver (NOT INCLUDED) to attach Metal Brackets (A) to the wall using Long Screws (D) in the location of the wall studs.

In a case where there is no wall stud, hold Metal Brackets (A) on wall and mark the drill hole positions so that they are roughly 1 inch below the top of the piece. Using a drill with a drill bit roughly the diameter of the plastic Anchors (E), drill pilot holes in marked positions. Insert the plastic Anchors (E) into the holes until the tops are roughly flush with the wall. Align the holes and insert the Long Screws (D) through Metal Brackets (A) and into the corresponding holes in the wall using a Phillips head screwdriver (NOT INCLUDED).

Next, attach remaining Metal Brackets (A) to the back of the furniture piece using Short Screws (C) so they align with Metal Brackets installed on the wall. Loop Restraint Strap (B) through Metal Brackets (A) on the furniture piece, then through Metal Brackets (A) on the wall and tighten until snug. Installation is now complete.

IMPORTANT: Check that the Metal Brackets is firmly screwed into the wall and the Restraint Strap is snug. If

there is any hesitation, please consult a professional or your local hardware store.
