Anti-Tip Measures

Warning - Children may be injured by tipping of furniture and the use of the Anti-Tip Kit is highly recommended. This Anti-Tip Kit is only a deterrent. It is not a substitute for proper adult supervision. Manufacturer and retailer assume no liability for improper installation or excess loads placed on screws, brackets, or straps. When properly installed, this restraint provides protection against unexpected tipping of furniture. This Anti-Tip Kit **MUST** be installed into the wall using proper mounting hardware OR into a wall stud using appropriate screws. Position of the Anti-Tip Kit depends on the product and the location of the wall studs. The hardware provided is not a comprehensive solution for all wall types. Be sure to consult a professional or your local hardware store to determine the hardware needed for your specific wall type (plaster, drywall, concrete, etc.).

Anti-tip kit installation

⚠ WARNING

Children have died from furniture tipover. To reduce the risk of furniture tipover:

- ALWAYS install tipover restraint provided.
- NEVER put a TV on this product.
- NEVER allow children to stand, climb, or hang on drawers, doors, or shelves.
- NEVER open more than one drawer at a time.
- Place heaviest items in the lowest drawers.

This is a permanent label. Do not remove!

Using a second person to assist you, place the unit in the desired final location against a wall. It is suggested to use a stud finder to find wall studs along the length of the unit and roughly 1 inch below the top of the unit. Where possible, mark a drill hole position on the wall where there is a stud and Screws (02) in the location of the wall studs.

In a case where there is no wall stud, hold Brackets (05) on wall and mark the drill hole positions so that they are roughly 1 inch below the top of the piece. Using a drill with a drill bit roughly the diameter of the plastic Wall Anchors (04), drill pilot holes in marked positions. Insert the plastic Wall Anchors (04) into the holes until the tops are roughly flush with the wall. Align the holes and insert the Long Screws (02) through Brackets (05) and into the corresponding holes in the wall using a phillips head screwdriver (NOT INCLUDED).

Next, attach remaining 2 Mounting Brackets (05) to the back of the piece using Short Screws (03) so they align with Brackets installed on the wall. Loop Nylon Restraint Straps (01) through Mounting Brackets (05) on the furniture piece, then through Brackets on the wall and tighten until snug. Installation is now complete.

IMPORTANT: Check that the Wall Bracket is firmly screwed into the wall and the Cable Tie is snug.

If there is any hesitation, please consult a professional or your local hardware store.
